steps being taken include maximising the generation from existing capacity, reduction in T&D losses, effective load management and energy conservation measures and arranging assistance from neighbouring States/Systems etc.

Exemption of Power Plants From Minimum Return Criteria of 3%

4384. SHRI VIRENDRA KATARIA: Will the PRIME MINISTER be pleased to state:

(a) whether Government have decided to exempt from the minimum return criteria of 3% laid down by Power Finance Corporation for renovation and modernisation of power plants for extending finances;

(b) whether P.F.C. has made available amount between Rs. 3,000/- crores for renovation and modernisation of power plants in order to increase the plant load factor and longevity of the plants;

(c) whether it is a fact that some foreign companies are being contacted or negotiated to participate by bringing latest technology and management practices; and

(d) if so, the details thereof, and by when the procjct is likely to be taken up and completed?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (DR. S. VENUGOPALACHARI): (a) The minimum return criteria of 3% laid down by Power Finance Corporation has been relaxed for renovation and modernisation of Power Plants for extending financial assistance to the State Electricity Boards.

(b) An overall requirement of Rs. 2500—3000 crores has been projected during the 9th Five Year Plan to revamp/ retrofit and to achieve life extension of power plants more than 20 years old.

(c) and (d) Power Finance Corporation is not negotiating with foreign companies for bringing latest technology and management practices in the area of renovation & modernisation of the Power Stations. However, the Corporation is taking initiatives to short list vendors for renovation works.

Utilisation of Tapti Gas field for power projects in Gujarat

4385. SHRI AHMED PATEL: Will the PRIME MINISTER be pleased to state:

(a) whether Government propose to get natural gas released from Tapti fields to Gujarat to enable it to establish gas based power project in the State to meet the demand of electricity; and

(b) if so, the details thereof and if not, the reasons therefor?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (DR. S. VENUGOPALACHARI): (a) No, Sir.

(b) Does not arise in view of (a) above.

New Power Plants in 1997-98

4386. SHRI SANJAY NIRUPAM: Will the PRIME MINISTER be pleased to state:

(a) the number of new power plants proposed to be set up during the current year i.e. 1997-98;

(b) what will be the total investment required therefor; and

(c) the steps taken by Government to encourage the private sector in the power projects?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (DR. S. VENUGOPALACHARI): (a) and (b) The target for capacity addition for 1997-98 are yet to be finalised. Plan outlay for Central Sector for 1997-98 is Rs. 6942.85 crores.

(c) In view of the paucity of resources in the public sector for capacity addition in power generation, a policy to encourage private participation was formulated

in 1991 and the response from private sector is encouraging.

Completion of Mega Power Projects

4387. SHRI VEDPRAKASH P. GOYAL: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that no significant power generation took place in the country during the period of five years after the liberalisation was initiated;

(b) if so, what are the new factors being relied upon to attract private entrepreneurs in this field;

(c) the project-wise time schedule for financial closure and completion as projected by Government for all the Mega Power Projects;

(d) the confirmed fuel linkage for each of the Mega Power Projects; and

(e) whether the Power Grid Corporation has finalised the basic parameters of the prospective agreements with the State Electricity Boards?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (DR. S. VENUGOPALACHARI): (a) and (b) The Government has not found it difficult to attract investments in power sector from private parties. In view of the paucity of resources in the public sector for capacity addition in power generation, a policy to encourage private sector participation was formulated in 1991. Since then, as on date, 127 proposals have been received from private promoters for setting up power projects in the private sector. These include 95 proposals on the Memorandum of Understanding (MoU)/ Letter of Intent (LoI) etc. route costing more than Rs. 100 crores and 32 proposals on the competitive bidding route costing more than Rs. 1000 crores. The policy is refined from time to time to make it more effective to attract private investment.

As per information available the power projects in the private sector on the MoU/LoI, etc., route (costing more than Rs. 100 crores) which have commenced partial generation are given below:

Sl. No.	Name of the project	Total Capacity (MW)	Capacity commissioned (MW)
1.	Hazira Combined Cycle Gas Turbine	515	3×110
2.	Jegurupadu Combined Cycle Gas Turbine	216	3×45.8
3.	Godavari Combined Cycle Gas Turbine	208	45.8

(c) to (e) Mega power projects are in the nascent stage of development and reaching the stage of financial closure would depend on a number of factors such as successful completion of prequalification of developers, tying up of various necessary inputs/clearances including fuel linkage and identification of beneficiary states, finalisation of various security packages, wheeling agreements between Powergrid and beneficiary states etc.

Development of Hydropower Projects

4388. SHRI KRISHNA KUMAR BIRLA:
SHRI PREM CHAND GUPTA:

Will the PRIME MINISTER be pleased to state:

(a) what is the existing power generation potential in respect of small hydro power projects in the country as also the installed capacity;
